

# Get your Masters Online!

BY JESS PEPE  
CONTRIBUTING WRITER

University of Southern California (USC) is now offering a Masters of Arts in Teaching (MAT) program, and it will be delivered online. I was recently approached by an employee of the company 2tor, which is trying to promote this first even online program for Master Degrees in the area of teaching.

I assumed this would be a beneficial and worthwhile article according to the large enrollment in the teaching program we have here at WPU. Now, after graduating with a BA and teaching certificate, you can sit in the comfort of your homes with your laptop in front of you, and earn that Masters Degree!

The four academic themes of this program at USC are "Leadership, Diversity, Learning, and Accountability" for both their in-classroom and online courses and programs.

Dr. Karen Symms Gallagher stated that, "USC's Rossier School of Education has been known for their breakthrough programs and initiatives," such as this first ever online opportunity for teaching

degrees.

Take advantage of this "first and only Master of Arts in Teaching program delivered online." This research university's program anticipates all degrees to be earned in as little as one year for full-time students or up to three years for part-time students.

One of the more beneficial aspects of the program is that USC prides themselves of "providing opportunities for global exchange, seeking innovative approaches to learning, uniting theory and practice, and offering personalized student experience." (I already told my boyfriend about this; higher degree equals higher paycheck. Higher paycheck for him equals bigger engagement ring for me!)

Take some time to find out more information on this wonderful program. Whether you're thinking about, in the progress of, or already a teacher, the MAT at USC can be an extremely useful and helpful program to enhance your education and career. For more questions, email [ahermalyn@2tor.com](mailto:ahermalyn@2tor.com).

To apply to the program, visit website or call 1-888-MAT-1USC (628-1872). t <http://rossier.usc.edu/mat/>.
